

GOODWILL BRIDGE, BRISBANE

eBeacon FRONT VIEW

eBeacon

Discreetly housed within the eBeacon are the antennae and radio systems which enable 4G and 5G capabilities on behalf of mobile operators, as well as the programmable LED lighting structure which facilitates Smart City lighting design. The eBeacon has a 2500mm height and houses a shared antennae system at a SMART.NODE™ height between 7 and 12m.

The eBeacon can accommodate:

- 4G/5G omni-directional antenna
- Flat panel directional antenna
- Active antenna
- Wi-Fi antenna
