LANDSCAPE SCREEN, FRONT VIEW

Digital Screen

MEDIA

Digital Screens are now a staple in Smart Cities and provide an on-the-go resource for the public to access information and stay connected. They have a role not only in reshaping a city's visual landscape, but also in reshaping the relationships between people and their community.

The SMART.NODE™ can accommodate a range of outdoor Digital Screens (DSs), including a 46, 55, 75 or 85-inch screen in landscape or portrait orientations. DSs can scale pictures and videos to suit the screen resolution, can feature scheduled content, and users can connect to the screen for local control.

Current DSs feature a slim depth (85mm) design, the convenience of an embedded power box, as well as added durability and flexibility even in extreme temperatures. Combined with 2,500 nit brightness, a 5000:1 contrast ratio and anti-reflection glass, these DSs ensure messages are displayed effectively in a variety of public spaces.

Product Options

- Visual Display 55-inch Screen - Single-Sided (Samsung OH55F) MED-VDS-000-56-001A
- Visual Display 55-inch Screen - Double-Sided (2 x Samsung OH55F) MED-VDS-000-56-002A
