## mBeacon with 4G/5G Capability

### COMMUNICATIONS

The mBeacon is designed to house a mix of antennas and radio systems which enable 4G and 5G capabilities in the traditional radio frequencies as well as the new mmWave frequencies. The mBeacon retains the programmable multi-coloured LED light, designed to support and enhance special events and celebrations. The mBeacon has a 2500mm height and houses a shared antennae system at a SMART.NODE™ height between 7 and 12m.

The mBeacon can accommodate:

- 4G/5G omni-directional antenna
- Flat panel directional antenna
- Active antenna
- Wi-Fi antenna
- mmWave antenna

### Product Options

- mBeacon 400 - Optus Nokia, including Programmable Multi-coloured LED Light
- mBeacon 400 - Optus Nokia (Optimised), including Programmable Multi-coloured LED Light
- mBeacon 400 - Optus Ericsson, including Programmable Multi-coloured LED Light
- mBeacon 400 - Optus Ericsson (Optimised), including Programmable Multi-coloured LED Light
- mBeacon 400 - Telstra, including Programmable Multi-coloured LED Light
- mBeacon 260 - Telstra, including Programmable Multi-coloured LED Light
- mBeacon 260 - Optus Ericsson, including Programmable Multi-coloured LED Light
