

CANADA BAY, SYDNEY

Flood Detection Sensor

ENVIRONMENT

Digital Infrastructure can have a variety of unique environmental characteristics and concerns, and aren't just made up of skyscrapers. With water levels rising, cities near the coast lines need flood monitoring systems to ensure the safety of communities in public spaces and on roadways.

Housed within the Base of the SMART.NODE™, a water level sensor monitors for these threats.

Product Options

Libelium Flood Detection (Ultrasonic)

DS-EV-SEN-FLO-SN-007-A

Product Dependencies

Libelium Smart Agriculture Gateway

DS-EV-SEN-GAT-SN-002-A
